

1. Discussion Objective:

Work Session Date: October 17, 2011

Discuss pedestrian crossing signs for installation along Estero Blvd.

2. Submitter of Information:

Council

X Town Staff - Public Works

 Town Attorney

3. Estimated Time for this item:

15 minutes

5. Background:

Town Council approved a pilot study to install pedestrian crosswalk signs at 4 locations along Estero Blvd. There has been interest expressed to make those locations permanent and expand the signs to other locations along the boulevard.

Through conversations with Lee County Department of Transportation (LDOT) they have no objection to making the 4 locations permanent and are willing to consider other locations. The understanding is that the 4 existing and all new locations will be paid for, installed and maintained by the Town of Fort Myers Beach. LDOT will review and require approval of all locations through their Right-of-Way Permitting process. LDOT has indicated a willingness to assist the Town with the placement location of the signs using their transportation engineering staff. This assistance will provide good benefit to the Town.
